

## **Installation Help**

To build on your system you need to have the following installed :

1. Qt Creator 4.7.4 or more. Qt Quick 1.1 is the minimum requirement for this game.
2. If you get an error saying module "Qt.labs.particles 1.0 is not installed", go to synaptic manager and install the following plugin "libqt4-declarative-particles".
3. MP3 codec must be installed to play the sound. You can try installing the "good","bad" and "ugly" packages from synaptic.
